

SPEAK2 CORPORATE

We have created a dashboard for users that want to view data across communities and access multiple communities with one login.

- **Select communities you want to access and view**
- **View requests across all communities**
- **Search for residents across selected communities**
- **Send an Announcement across selected communities**
- **Send Community News across selected communities**
- **Access each individual community and navigate between communities**

The screenshot shows the 'Corporate Dashboard' interface. At the top, there are navigation tabs for 'Dashboard' and 'Call Center', and a user profile dropdown labeled 'corp'. The dashboard is divided into several sections:

- Open Requests:** A list of requests with filters for 'Start date', 'End date', and 'Filter by departments...'. A red arrow labeled 'View requests' points to the list.
- Search residents by name or apartment:** A search bar with a magnifying glass icon. A red arrow labeled 'Manage Content' points to the search bar.
- Announcements:** A section for sending announcements to all residents across all selected locations. It includes a text input field, checkboxes for 'Send SMS' and 'Send Email', and a 'Send' button.
- Community News:** A section for sending news feed items to all residents across all selected locations. It includes a text input field, a 'Select date' button, an 'Image' upload icon, and a 'Send' button.
- Your Communities:** A list of communities with checkboxes for selection. A red arrow labeled 'View communities. Check/uncheck to view.' points to the list.
- Reporting Dashboards:** A section at the bottom right with a pie chart icon and the text 'Coming soon Reporting Dashboards'.
